

SOLUTION PROPOSAL

Maillot Store Retail Management & E-commerce System

Version: 1.0

1. Executive Summary

Maillot Store currently manages most of its business operations using manual processes and Microsoft Excel. As the business grows, these methods become more time-consuming, increase the risk of errors, and make it difficult to efficiently manage inventory, customer orders, influencer commissions, and business reporting.

To address these challenges, we propose the development of a **Retail Management & E-commerce System** that will centralize both physical and online store operations into a single platform. The system will improve operational efficiency, enhance customer experience, and provide a scalable foundation for future business growth.

2. Business Challenges

The proposed solution addresses the following business challenges:

- Manual inventory management using Excel.
- Limited visibility into stock availability.
- Difficulty managing online and offline sales together.
- Manual tracking of influencer commissions.
- Limited reporting for business decision-making.
- Time-consuming order management.
- Lack of centralized customer information.

3. Proposed Solution

The proposed solution is a web-based Retail Management & E-commerce System that enables Maillot Store to manage its day-to-day operations from a single platform.

The system will support:

- Physical shop sales
- Online shopping
- WhatsApp-assisted orders
- Phone-assisted orders
- Inventory management
- Customer management
- Influencer programme
- Payment management

- Delivery tracking
- Business reporting
- Website content management

The solution is designed to improve operational efficiency while providing customers with a modern online shopping experience.

4. Proposed System Modules

The proposed system will include the following modules.

Customer Portal

- Browse products
- Search and filter products
- View product details
- Add products to cart
- Guest checkout
- Customer registration
- Order tracking
- Order history
- Address management

Influencer Portal

- Influencer registration
- Referral links
- Commission tracking
- Withdrawal requests
- Sales history

Product Management

- Products
- Categories
- Brands
- Product variants
- Product images

Inventory Management

- Stock management
- Stock movements
- Low stock alerts
- Damaged products

- Lost products

Supplier & Purchase Management

- Supplier records
- Purchase records
- Purchase history

Order Management

- Website orders
- Walk-in sales
- WhatsApp orders
- Phone orders
- Order tracking

Payment Management

Supported payment methods:

- MTN Mobile Money
- Orange Money
- Cash Before Delivery

Delivery Management

- Delivery tracking
- Delivery status updates
- Third-party delivery management

Reporting & Analytics

- Sales reports
- Inventory reports
- Customer reports
- Influencer reports
- Revenue reports

Administration

- Dashboard
- User management
- Roles & permissions
- Website content management
- System settings

5. System Users

User	Primary Responsibility
Visitor	Browse products and promotions
Customer	Purchase products and track orders
Influencer	Promote products and earn commissions
Staff	Process sales and manage inventory
Administrator	Manage the entire business system

6. Business Benefits

The proposed solution will provide the following benefits:

- Centralized business management.
- Improved inventory accuracy.
- Faster order processing.
- Better customer experience.
- Increased online sales opportunities.
- Automated influencer commission management.
- Better business reporting.
- Reduced manual work.
- Improved business decision-making.
- A scalable platform for future expansion.

7. Version 1 Scope

The first version of the system will include:

- ✓ Responsive e-commerce website
- ✓ Customer portal
- ✓ Influencer portal
- ✓ Product management
- ✓ Inventory management
- ✓ Supplier & purchase management
- ✓ Order management

- ✓ Payment management
- ✓ Delivery management
- ✓ Reporting & analytics
- ✓ Website content management
- ✓ Administration dashboard

Conclusion

The proposed Maillot Store Retail Management & E-commerce System provides a modern, centralized solution for managing physical and online retail operations. By integrating inventory, sales, customer management, influencer marketing, payments, deliveries, and reporting into a single platform, the system will improve efficiency, enhance customer satisfaction, and support the long-term growth of Maillot Store.
